

Lactation Care Provider Demographic Survey

2019 Data

USLCA
United States Lactation
Consultant Association

In an effort to better understand the demographics of the lactation profession within the United States, USLCA launched an open survey to the entire profession last year. As a service to the profession, we are publishing the preliminary results of the data. While we understand the need for this data, we also recognize the limitations associated with this small of a sample size. It is our sincere hope that by keeping the survey open, we will gather a larger number of entries to better enhance the findings. You can enter your information by visiting bit.ly/lcp-demographics.

Sample size: 346

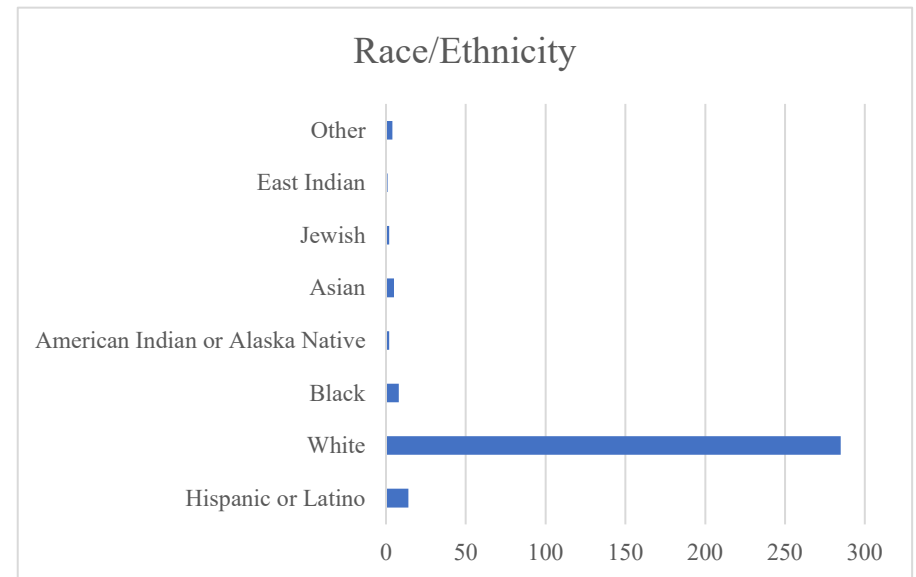

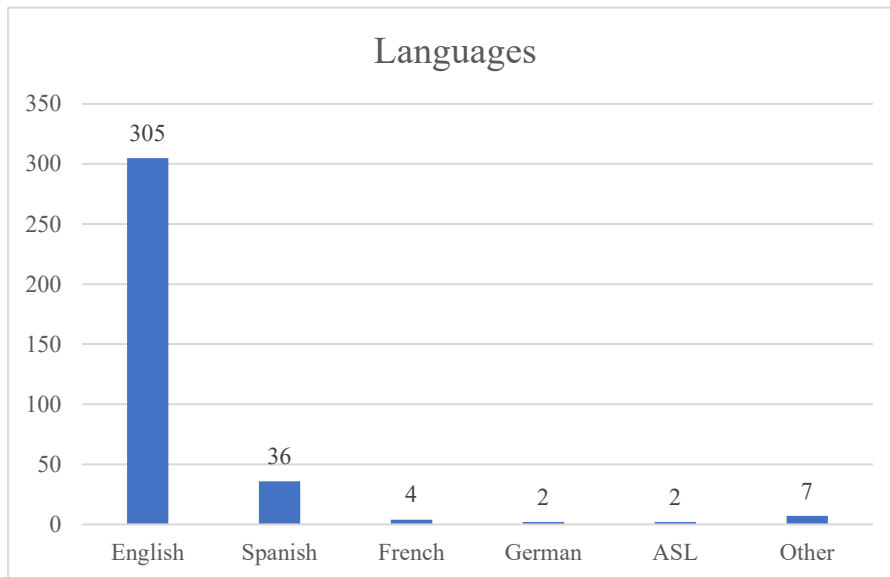

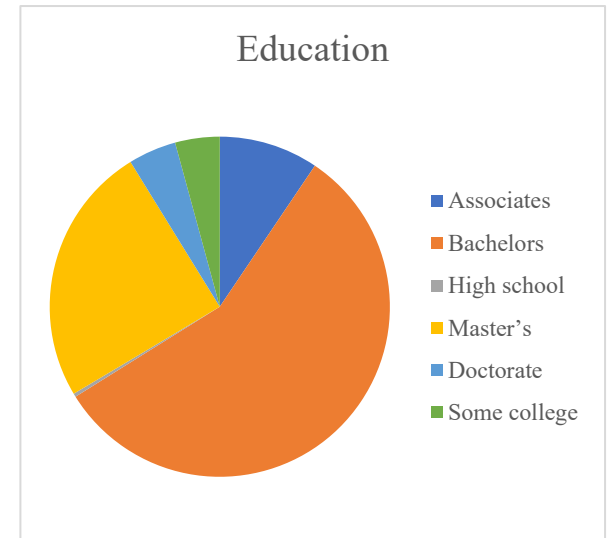

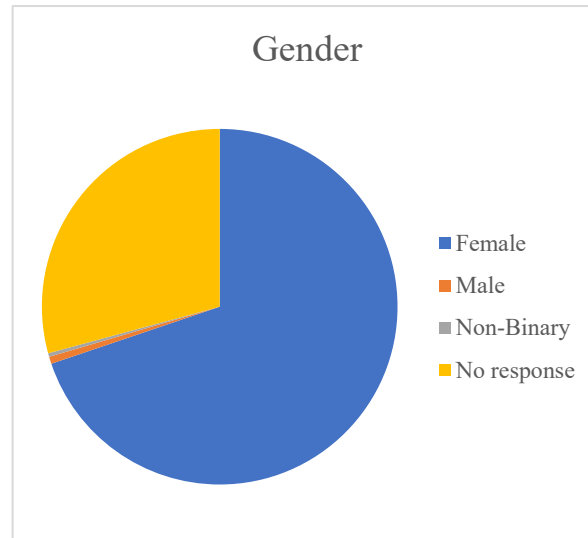

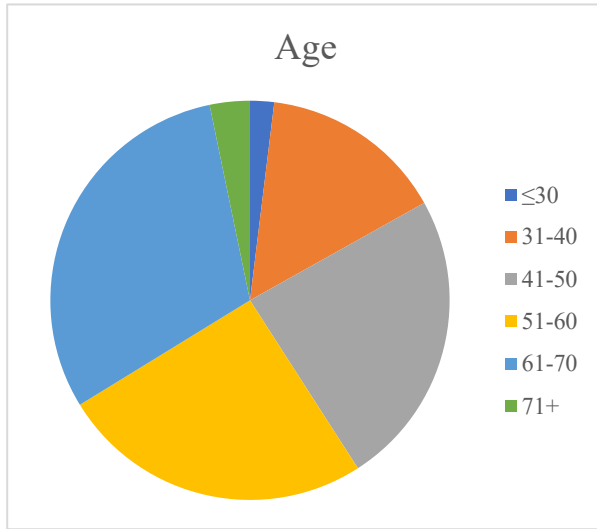

Contact the USLCA office for additional data requests.
