Perinatal Equity Initiative Black Infant Health

WE NEED YOUR HELP TO STRENGTHEN PEI AND BIH

The purpose of the Perinatal Equity Initiative (PEI) is to address the causes of persistent inequality and identify best practices to deal with disparities in African-American infant mortality.

The Black Infant Health (BIH) program works to reduce the infant mortality rate of African-American pregnant and parenting women through group model and case management.

Join the PEI/BIH Community Advisory Board (CAB) to provide input with other community representatives about the best ways to support and outreach to the African-American community.

In 2018, recognizing an alarming statewide gap in African-American infant mortality, PEI was established within the California Department of Public Health.
